

Latticist on CO2

A demonstration of the **latticist** package

Felix Andrews

November 2008

Introduction

The **latticist** package provides an exploratory visualisation application inside R. It is primarily an interface to the **lattice** graphics system, although it also produces displays from the **vcd** package for categorical data.

This document gives a demonstration of **latticist** applied to the CO₂ dataset, available in R's **datasets** package.

The data are from an experiment on the cold tolerance of a grass species. The CO₂ uptake of six plants from Quebec and six plants from Mississippi was measured at several levels of ambient CO₂ concentration. Half the plants of each type were chilled overnight before the experiment was conducted. – *from ?CO2*

Initial display

```
> spec <- list()
> latticist(CO2, spec = spec)
marginal.plot(CO2, data = CO2, sub = list("N....
```

Set y variable

```
> spec$yvar <- "uptake"  
qqmath(~uptake, data = C02, main = "Distribu....
```

Distribution of uptake

N = 84, 2008-11-11, R 2.8.0Patched

Set x variable

```
> spec$xvar <- "conc"
```

```
xyplot(uptake ~ conc, data = C02, main = "up....
```

N = 84, 2008-11-11, R 2.8.0Patched

Set grouping variable

```
> spec$groups <- "Treatment"
```

```
xyplot(uptake ~ conc, data = CO2, groups = T....
```

N = 84, 2008-11-11, R 2.8.0Patched

Set conditioning variable

```
> spec$cond <- "Type"
```

```
xyplot(uptake ~ conc | Type, data = CO2, gro....
```

N = 84, 2008-11-11, R 2.8.0Patched

Each plant separately

```
> spec$cond <- "Plant"
```

```
xyplot(uptake ~ conc | Plant, data = C02, gr....
```

N = 84, 2008-11-11, R 2.8.0Patched

Details

The results in this document were obtained using R 2.8.0 with the packages **lattice** 0.9–41, **lattice** 0.17–15, and **latticeExtra** 0.5–4. R itself and all packages used are available from CRAN at <http://CRAN.R-project.org/>.
